Subject: Product Discontinuation Notice – Z5U (Z) and Y5V (Y) Dielectric Parts

Dear Customer,

Effective December 2016 Novacap will no longer offer the dielectric type Z5U or Y5V ceramic capacitors. We encourage you to review your potential requirements for the listed part numbers you have purchased in the past from Novacap and either place last time buys for such parts or consider alternate materials that will fulfil your needs.

Typically the parts you sourced in the past can be replaced by X5R or X7R dielectrics which are common to the industry and to Novacap. These dielectrics will outperform what was originally designed in for form, fit and function.

We are pleased to process your last time buy orders of the Z5U/Y5V material parts provided the order is placed prior to August 2016. Lead time for these last time buys will be 12 to 14 weeks.

We thank you in advance for your understanding and cooperation in this matter, we will continue of course to support your requirements for other products as usual.

Yours Sincerely,

Novacap Management

Part Listing according to our records for past 2 years:
